DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/11/07 has been entered.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130 (b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 2-14, 16-25, 27-33 and 35-41 and 43 are rejected under the judicially created doctrine of **obviousness-type** double patenting as being unpatentable over claims 1-26 of copending U.S. Patent Application No. 10/669,422, which is equivalent to Patent Publication No.

Art Unit: 1714

2004/0124504; and claims 2, 4-17, and 20-23 of copending U.S. Patent Application No. 10/670,670 now allowed. Although the conflicting claims are not identical, they are not patentably distinct from each other because both inventions encompass and claim aqueous dispersions of an electrically conductive organic polymer and a plurality of nanoparticles.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

1. Applicant's arguments filed 9/13/06 have been fully considered but they are not persuasive. There is clear overlap between the present and copending inventions. It would have been obvious to select an inorganic or an organic nanoparticle from the claimed invention of the copending applications.

The rejection under the judicially created doctrine of **obviousness-type** double patenting over U.S. Patent Application No. 10/669,422 and 10/670,670 is withdrawn in view of applicant's comments.
